

Dehumidifier

DivinAir Dehumidifier is optimal for all of your small spaces including closets, cabinets, cars, bathrooms and jewelry boxes etc.

Engineered with non-toxic, safe and spill-free silica gel crystal beads, it can efficiently absorb moisture in the air to protect your belongings.

Product Diagram

- 1 Moisture indicator
- 3 AC Power Cable
- **6** Power port

- 2 Supporting base
- 4 Power indicator

Indications

Precautions

- Before operating the device, please read this manual and all the safety instructions thoroughly and retain it for future reference.
- 2. Please use the accessories included with this product only.
- The dehumidifying rate will vary depending on the environment, humidity and season, and will affect the discoloration speed of the hygroscopic beads in the display window.
- When the hygroscopic beads are in use or regenerating, differences in color and the charging rate are normal.

Instructions

- 1. Before first use, please ensure the hygroscopic beads in the display window are orange. If they appear dark green, please run the regeneration process (see step 3).
- When the color of the hygroscopic beads in the display window is orange, the dehumidifier is ready for use. Place the device in areas where moisture protection is needed, such as wardrobes, cabinets, etc.
- 3. When the hygroscopic beads in the display window are dark green, it means that the moisture in the dehumidifier is full. Plug the device to power for 4-12 hours to regenerate the hygroscopic beads. When the color of the hygroscopic beads in the display window changes back to orange, it means that the moisture has completely discharged, and the dehumidification function is restored, and the dehumidifier is ready to work again. Unplug the device to start using.

Tips

- This product can be placed vertically or horizontally. When placed horizentally, the supporting seat faces outward. Do not cover with any kind of material while in use and keep the device at least 10 cm away from other items.
- 2. When dehumidifying, the device is more effective when placed upright.
- 3. Water vapor is released while charging, and the machine will generate heat. Do not charge the product on soft surfaces or areas with poor heat dissipation to avoid damaging the unit. For best results place the device upright / vertically when plugged in.

Troubleshooting

While charging, the power indicator does not light up.

Probable cause: Power is not connected or there's no power from the outlet.

Solution: Make sure your power source is on and plug in with the device, if the device still does not work, please contact customer support.

The indicators lights up normally but the dehumidifying function does not work.

Probable cause: The moisture inside the device has not been completely discharged.

Solution: Please power on the device and continue the generating process for a few hours until the particles in the display window turn orange.

Remarks: If the problem still exists after using the above solutions, please contact customer support for further assistance. Non-professionals are prohibited from disassembling the device.

Safety Precautions

- 1. Keep away from fire or any heat sources.
- 2. When the device is not in use for a prolonged period, please turn it off, unplug it, pack it well, and store it in a cool, dry place.
- When powered on, the power indicator will light up and the device will get warm, which is normal. Place the unit vertically when plugged in and do not cover it for best results.
- 4. Never place anything on top of the unit or cover it with any kind of material while in use.
- When powered on, water vapor appears in the display window, and the hygroscopic beads while drying may produce some minor noise, which is normal.
- 6. The device should be installed a minimum distance of 10 cm away from the wall or other obstacles to avoid blocking the air inlet/outlet.
- 7. Do not attempt to repair or disassemble the product.
- 8. Not for outdoor use.
- Close supervision is necessary when the device is used around children, elderly people, or pets.
- 10. If the power cord is damaged, power off and stop using the device. Contact customer support for further assistance.
